

Have You Lost a Loved One Who Died Suddenly and Unexpectedly at a Young Age?

Dr. Shubhayan Sanatani of British Columbia Children's Hospital Heart Centre is conducting a research study in the hope that it will help to understand how the health care system can better assist families who have lost a family member who died suddenly.

We are looking for first degree relatives (genetically related) of people who have died a sudden unexpected death (SUD).

To participate in this study,

- The loved one who has passed away from a SUD must have been between the ages of 0-35 years;**
- You must be 18 years or older;**
- You must be a first degree relative (mother, father, daughter, son, sister, brother, and half siblings but not step siblings);**
- You must be able to understand spoken English.**

**If you are interested in participating in our study, please contact Dr. Sanatani's research office at BC Children's Heart Centre,
604-875-2345-7955.**
